## INTRODUCTION

Pursuant to Senate Resolution 358, as adopted by the Senate of the 98th General Assembly, the Commission on Government Forecasting and Accountability has been directed to conduct a study examining the fiscal impact of local governments realized from transferring an incarcerated individual from his or her physical address of incarceration to their last permanent home address prior to incarceration, for purposes related to the process of census enumeration. In response, the Commission has created the following report which provides a summary of the fiscal impact that such a change would have on local governments.

As expected, there are “winners” and “losers” associated when doing such a calculation. The “winners” would be those local governments that would obtain higher population totals due to the ability to count incarcerated individuals in their census population calculations. The distribution of State funds is, in certain cases, tied to a local government’s population. The higher an area’s population, the more funding they receive. Of course, this means that the lower a local government’s population, the less funding they receive. Therefore, the “losers” would be those areas in which the population would decrease as a result of counting incarcerated individuals according to their last permanent home address rather than the location of their current incarceration.

The Commission identified four primary areas of State funding that are determined by a local government’s population. These funding sources are as follows:

- 1) Personal Income Tax. State law provides that 1/10 of net revenues (tax revenues less amounts to the refund fund) of the base rate of 3% shall go to the Local Government Distributive Fund (LGDF). (At the 5% tax rate, this equates to 6% of net revenues to the LGDF). *In FY 2014, the Commission estimates this amount to be approximately \$962 million, or \$75 per Illinois resident.*
- 2) Corporate Income Tax. State law provides that 1/10 of net revenues (tax revenues less amounts to the refund fund) of the base rate of 4.8% shall go to the Local Government Distributive Fund (LGDF). (At the 7% tax rate, this equates to 6.86% of net revenues to the LGDF). *In FY 2014, the Commission estimates this amount to be approximately \$201 million, or \$16 per Illinois resident.*
- 3) Sales Tax. State law provides that the 1.25% portion of the 6.25% State sales tax is to be distributed to local governments. Of this amount, 20% is distributed to Chicago (not based on population), 10.6% is distributed to various transit districts, and \$37.8 million is distributed to the Build Illinois Bond Account Fund. The remainder is then sent to the Local Government Distributive Fund, in which the funds are distributed by population to local governments other than the City of Chicago (since the City already received a portion). *In FY 2014, the Commission estimates this amount to be approximately \$150 million, or \$15 per non-Chicago resident.*

4) Motor Fuel Tax. State law provides that of the tax revenue collected from the State motor fuel tax, after certain statutory distributions are made, a portion of the remainder (22.4%) is to be apportioned to municipalities. These monies are then distributed according to population. *In FY 2014, the Commission estimates this amount to be approximately \$264 million, or \$21 per Illinois resident.*

Therefore, in total, it is expected that, in FY 2014, nearly \$1.6 billion in State funds will be distributed to local governments throughout Illinois based on population. This equates to approximately \$126 for every Illinois resident.

### Methodology

In order to perform this study, information was needed from the Illinois Department of Corrections (IDOC). In July 2013, the Commission requested the following information from IDOC:

1. The inmate's name and/or inmate number.
2. The inmate's current assigned correctional facility (facility name, city, county).
3. The inmate's last permanent complete home address prior to incarceration.

In response, IDOC sent the Commission a spreadsheet containing the requested items, filled out to the best of their abilities.

In many cases, the last permanent address of an incarcerated individual was not known, and therefore left blank. For the purpose of this study, it is assumed that since their last address is not known, they will continue to be counted at the place of incarceration rather than another location. As a result, these individuals were removed from the database.

Also removed from the database were individuals labeled in the "Institution" column as "Electronic Detention" or "Fed/State/Trans Other State". Those with electronic detentions would likely be counted for population purposes at their home address anyways, so their exclusion from the database would likely not impact the results. It is unclear where those labeled as "Fed/State/Trans Other State" would be counted for population purposes, so they also were removed from the base.

A number of individuals had out-of-state addresses as their last permanent home address. In these cases, since this State funding would not be distributed to other states, it is assumed that these individuals would still be counted, for population purposes, at their current place of incarceration. As a result, these individuals were removed from the data base as well, as they would not impact the results of the study.

The inmate database consisted of 48,877 individuals. Of these, 34,418 or 70.4% had a known Illinois address. Those with known out-of-state addresses made up 1,026 or 2.1% of the total. There were 13,311 inmates (27.2%) in which the last permanent

address was not known. The remaining 122 inmates (0.2%) came from electronic detention or transferred inmates.

There were 45 institutions throughout Illinois that held the 48,877 inmates. The facility's exact location is an integral part to this study. This is because these locations, and more specifically, the local government the facility it is annexed in, would be the areas affected the most if the population were to be counted at the last permanent home address rather than their place of incarceration. These local governments would lose out on the allocation of funds if the inmate population is counted elsewhere.

Although the location of a facility may be labeled in its address to be in a certain town, that town may not be the direct recipient of State distributions. This is because the actual location of an institution may be in the rural areas of a county and not in the city limits of the municipality. In this case, the incarcerated individuals, for Census purposes, were counted in the population of the county and not for the municipality. For example, the location of the Shawnee Correctional Center was labeled in the database as Vienna, Illinois. However, since the facility is actually located outside Vienna, these inmates are actually counted in the 2010 census as being in Johnson County. Therefore, currently Johnson County is the direct recipient of funding due to this population set and not the town of Vienna.

The Commission attempted to determine the actual area where inmates from the 45 institutions were likely counted for population purposes. This was done by looking at numerous municipality maps and contacting city and county governments. However, what could not be determined was the actual counting place of the permanent address of the incarcerated individual. For example, each address contains the name of a municipality in their address. But, it is not known whether that address is a rural address (counted in the population of a county) or a city address (counted in the population of that city). For the purposes of this study, it is assumed that the municipality labeled in the address would be the area claiming the person in their population counts and not the county. But the Commission acknowledges that this may not be the case in every situation (an example of this is discussed later in the report).

Finally, the Commission had to make several modifications to the database due to spelling and obvious labeling errors. These changes allow the data to be summarized and displayed on a consistent basis.

On the following page is a table summarizing the 48,877 inmates in the original database and the 34,418 inmates with a known Illinois address. This table identifies each facility, the number of incarcerated individuals at this location, and the area currently claiming the population of these individuals. The table also shows the number of inmates in which their Illinois address is known, and what percentage this figure is of the total. A synopsis of the data follows.

## Areas Impacted by Proposal

Nearly all of the municipalities/counties that currently have a prison in Illinois would be negatively impacted by the proposed change to count inmates at their last permanent home address. In fact, 28 of the 32 areas currently housing inmates would lose local government distributions under this proposal. Those areas that would lose revenues, as a result of this proposal, are shown below.

Locations Losing Revenues Under Proposal								
Location	Population	Total Tax Revenues Distributed (Current Law)	Population Location of Inmate (Current Law)	Population Location of Inmate (Proposal)	Net Change	Total Tax Revenues Distributed (Under) (Proposal)	Net Change in Distribution of Revenues	% Change in Allocated Funds
<b>TOTALS</b>	<b>12,830,862</b>	<b>\$1,577,364,305</b>	<b>34,418</b>	<b>34,418</b>	<b>-</b>	<b>\$1,577,364,305</b>	<b>\$0</b>

DU QUOIN	6,109	\$770,058	75	20	(55)	\$763,253	-\$6,805	-0.88%
GREENE COUNTY GOVERNMENT	4,854	\$611,862	26	1	(25)	\$608,812	-\$3,050	-0.50%

The local government that would be impacted the most (in terms of dollars lost) would be the City of Chester. Chester is the home to three facilities: the Menard Correctional Center, the Menard Medium Security Unit, and the Menard Reception and Classification Center. Combined, these facilities house 3,735 inmates. The city's population, according to the 2010 census was 8,586. This means that approximately 43.5% of the city's population was due to the inmate population. Using the provided addresses from IDOC, 2,807 inmates had known Illinois addresses outside of Chester. However, only 20 of their inmates claimed an address of Chester. This results in a net population change of 2,787.

Under current law, using the Commission's estimated distribution of FY 2014 revenues, Chester would receive approximately \$1.1 million. However, under this proposal, due to the shifting of the population to other locations, they would only receive \$713 thousand, a reduction of \$343 thousand or -32.5%. After Chester, the

largest declines of revenues would be in Crest Hill (\$0.3 M), Johnson County (\$0.3 M), Logan County (\$0.3 M), and the City of Hillsboro (\$0.2 M).

In terms of the percentage change of allocated funds, the community of Sheridan would have the largest falloff in revenues. Sheridan, which is home of the Sheridan Correctional Center, had 2,066 inmates labeled in the dataset as living at this facility (Although, it should be noted that the IDOC currently labels the population as 1,636 inmates). Their 2010 population was only 2,137, meaning the majority of their population comes from the prison. While it is not known how many of the 2,066 inmates labeled as living at the Sheridan Correctional Center were part of the 2010 census calculation, 1,400 of the inmates had a known Illinois address outside of Sheridan, with only 9 claiming Sheridan as their home address. This net difference of 1,391 would result in a 65.1% reduction in distributed funds.

The five areas with the largest change, in terms of percent change in allocated funds, are Sheridan (-65.1%), Ina (-54.4%), Sumner (-49.8%), Chester (-32.5%), and Brown County (-31.1%). All of these areas are sparsely populated locations. Because of this, the removal of a subset of the population from these areas would have a significant impact on their population totals. Consequently, this then makes them the biggest “losers” in this proposal because they would be the communities impacted the most due to their proportional loss of allocated funds.

Only a few local governments currently housing State prisons would not be negatively impacted by this proposed change. This would be those municipalities that have more “residents” incarcerated at out-of-town prisons than they currently house as inmates at facilities insider their area’s city limits. The four cities that would fall under this category, as shown below, are Chicago, Peoria, Decatur, and Aurora. Not surprisingly, these four locations are highly populated areas. While these locations do have State prisons within their city limits, they have more inmates from their cities at out-of-town locations than they house at their local prisons. As a result, these cities would have a positive net change in their population counts, enabling them to receive more local government distributions under this proposal than they would under current law.

Locations with Prisons Gaining Revenues Under Proposal								
Location	Population	Total Tax Revenues Distributed (Current Law)	Population Location of Inmate (Current Law)	Population Location of Inmate (Under Proposal)	Net Change	Total Tax Revenues Distributed (Under Proposal)	Net Change in Distribution of Revenues	% Change in Allocated Funds
<b>TOTALS</b>	<b>12,830,862</b>	<b>\$1,577,364,305</b>	<b>34,418</b>	<b>34,418</b>	<b>-</b>	<b>\$1,577,364,305</b>	<b>\$0</b>	
CHICAGO	2,695,598	\$299,782,715	354	14,724	14,370	\$301,380,830	\$1,598,116	0.53%
PEORIA	115,007	\$14,496,991	179	786	607	\$14,575,941	\$78,950	0.54%
DECATUR	76,122	\$9,595,415	559	895	336	\$9,639,380	\$43,965	0.46%
AURORA	197,899	\$24,945,785	105	335	230	\$24,978,952	\$33,167	0.13%

As stated previously, there were 28 municipalities/counties that would be considered “losers” under this proposed plan to shift population counts. But this means that the vast majority of the population would benefit financially from this proposed change and

would be considered “winners”. The biggest “winners” are those communities that have the largest amount of incarcerated residents at out-of-town locations. This is because these areas would be able to now count these individuals in their population counts, enabling them to obtain more funding from the State’s funds tied to population counts.

As shown below, in terms of change in dollars, the biggest “winner” was the City of Chicago. Chicago had 14,724 of their residents in prison somewhere in Illinois. Of this total, only 354 were housed in a facility in the City of Chicago. Therefore, under this proposal, a net change in the population of 14,370 would result. The Commission estimates that this shifting of the population would result in approximately \$1.6 million in additional funding for Chicago’s local government.

The other communities that would benefit the most from this proposal would be Rockford, Springfield, Joliet, and Peoria. The top 25 communities benefitting from this proposed change are shown below. As displayed, the majority of these top communities are the higher populated cities.

Top 25 Locations Gaining Revenues Under Proposal

The next table shows the top 25 locations in Illinois of communities benefitting the most under this proposal, in terms of percentage change in allocated funds. The village of

Topeka is shown to be the biggest “winner” because this proposal would allow their distribution of allocated funds to rise 9.23% because of the town would be able to count its seven incarcerated “residents” in their population totals. But it must be pointed out that this would only mean an additional \$884 for the community. The percentage change is relatively high because there are only 76 people in the community according to the 2010 census.

Topeka’s example is why this table should be used with caution. As shown, the majority of those communities listed below have populations of less than 1,000 residents, which makes any variation to their population noticeable, in terms of percentage change. The village of Macedonia is ranked 2<sup>nd</sup> on this list, but is only adding three residents to their population counts. While the village would likely welcome the additional dollars that would result, the additional funding for Macedonia would only amount to approximately \$380.

Top 25 Locations Winners Under Proposal in Terms of % Change in Allocated Dollars

This table also highlights another concern with the data set. As shown, the city of Vienna is ranked third on the list because, according to the “last permanent available address” provided by IDOC in their dataset, 68 individuals had their hometown labeled as Vienna. The town, according to the 2010 census had only 1,434 residents. Upon

further review of the labeled addresses, the majority of these Vienna addresses were the same address as the Shawnee Correctional Center. In other words, these individuals likely do not have a “last permanent home address” available, so they used the Correctional Center’s address. Similarly, Mount Sterling, which is in the labeling address of the Western Illinois Correctional Center is shown to rank high in the previous table, but many labeled their home address to be the same as the correctional center.

As mentioned in the methodology section, this leads to another problem with determining the impact on individual locations. The Shawnee Correctional Center’s address is P.O. Box 400, Vienna, IL. However, the actual location of the facility is not in the city limits of Vienna, so its residents, for census population purposes, are counted for Johnson County and not for the City of Vienna. So, while the previous table displays these residents as coming from Vienna, they should actually be counted as from Johnson County. Similarly, the majority of residents shown to be from Mount Sterling should actually be counted as from Brown County.

To accurately determine the fiscal impact of this proposed change, all of the known Illinois addresses of the 34,418 inmates would have to be evaluated to see if they live in or out of the city limits and if they are using the prison address (or a previous prison address) as their home address. Due to the difficulty in performing such a task, this was not done for this study.

At the end of this report (in Appendix A) is a listing of the 1,400 units of local governments throughout Illinois that currently receive funding from the allocation of State revenues according to population. This includes the 102 county governments that receive revenues from the rural populated portions of their county. These tables, sorted alphabetically, include the following:

- 1) Each location’s population according to the 2010 Census;
- 2) The estimated amount of FY 2014 funding that they will receive under current law from the Personal Income Tax, the Corporate Income Tax, the Sales Tax, and the Motor Fuel Tax;
- 3) The inmate population currently housed in their area;
- 4) The population of inmates claiming that area’s address;
- 5) The net change in population;
- 6) The estimated FY 2014 allocation of funding if the law were changed;
- 7) The Net Change in the distribution of revenues; and
- 8) The Percentage Change in Allocated Funds.

Appendix B, at the end this report displays the language of Senate Resolution 358, which is the resolution that directed this study.

## CONCLUSION

The Commission estimates that in FY 2014, nearly \$1.6 billion in State revenues from income, sales, and motor fuel taxes will be distributed to local governments based on population. Because of this, where an individual is counted is considered very important from the standpoint of determining how much each local government should receive from these distributions.

Senate Resolution 358 asked the Commission to examine the fiscal impact on local governments realized from transferring an incarcerated individual from his or her physical address of incarceration to their last permanent home address prior to incarceration, for purposes related to the process of census enumeration. As expected, the Commission determined that there would be definite “winners” and “losers” if such a change was allowed under Illinois law.

The “losers” would be those local governments with prison facilities residing in their area. Currently, these municipalities can count these incarcerated individuals in their population totals, which allows them to receive allocated dollars that are tied to population. The proposed change in how incarcerated individuals are counted would mean less population, and therefore less funding to these local governments that have a prison in their areas.

The “winners”, on the other hand, would be nearly every other local government in Illinois that does not have a State correctional facility. The amount of funding would increase the most for local governments that have a high percentage of incarcerated individuals claiming their area as the last known home address. This is because, under this proposal, a municipality would be able to count these “residents” in its population counts, thereby allowing it to receive additional State funding.

Using the data from IDOC, 28 local governments, consisting of 20 communities and 8 counties, would lose funding under this proposal. Combined, these units of government would lose nearly \$4.0 million in local government distributions. This \$4.0 million would, thus, be reallocated to the other 1,368 local governments across Illinois. Chicago, due to its large population of residents in prisons throughout the State, would gain the most from this change, receiving nearly \$1.6 million of the \$4.0 million. The remaining \$2.4 million would be spread out between the other local governments, again, depending on the number of incarcerated residents that they have in prison in other locations.

Although, the City of Chicago would gain the most under this proposal, it will only increase their funding by 0.53%. Other smaller communities, in terms of population, would see the largest percentage change in their funding, especially those smaller communities with a relatively large percentage of their population incarcerated in prisons across Illinois.

While these additional dollars to those receiving new revenues under this proposal would be welcomed, the increase in funding would be relatively small – generally less than 1% - of what they receive now. Only 87 communities would receive an increase

of more than 1%, with the highest amount that any of these communities would receive is \$42,047 (East St. Louis).

On the other hand, the impact on those losing this funding would be significant. Fourteen of the 28 local governments impacted by this proposed change would see their funding fall by more than 10%. The City of Chester would see the biggest loss in allocated dollars, dropping 32.5% of their funding from \$1.1 million to an estimated \$0.7 million. The tiny communities of Sumner, Sheridan, and Ina could see their funding fall by more than 50% due to this proposed change. And not only would this impact the smaller Illinois communities housing these prisons, but several of the sparsely populated counties with these facilities would also be significantly impacted. This would include Brown County (-31.1%), Johnson County (-25.6%), and Logan County (-22.5%).

It should be noted that these figures could be more pronounced if more data becomes available. Of the 48,877 incarcerated individuals in facilities across Illinois, only 72.5% had a known address. It is assumed that since the address of the remaining portion of the population is not known, that these individuals would not change population counts. However, if an effort is made to obtain the most recent home address of these individuals, the dollar totals shown previously could be higher.

If Senate Resolution 358's proposed change were to be brought before the Legislature, numerous questions would likely follow. Examples of these questions would be:

1. How will the incarcerated individual's address be accurately determined and verified?
2. Will this change impact the population counts of inmates incarcerated at other governmental facilities (i.e. federal prison, local prisons)?
3. Will this proposed change only impact census counts (every ten years) or would these counts be reevaluated on a more regular basis?
4. Who would be the group taking this "official" count of incarcerated individuals?
5. Would incarcerated individuals from out-of-state continue to use their place of incarceration as the location to be counted?
6. If this change occurs, will there be any sort of compensation for those units of local government that will be significantly impacted by this change?
7. Who ultimately should be the governmental body to benefit from an incarcerated individual's population count and its available funding: the area housing the inmate or the community that would be the home of the incarcerated individual when/if the inmate was released?

These questions and likely many more would come up if the proposed change under Senate Resolution 358 were to be pursued. Obviously, there are pros and cons to making this type of change in the process of census enumeration. It will be up to lawmakers to decide whether the modest financial gains realized by many of Illinois communities outweighs the significant negative impact this change would have on the locations that are the home to the 45 correctional facilities located throughout the State.

### SENATE RESOLUTION

2           WHEREAS, The United Congress of Community and Religious  
3 Organizations leads a grassroots-led multiethnic human rights  
4 alliance, to advance human rights and racial equity issues  
5 across the State; and

6           WHEREAS, The United Congress led an important effort to  
7 educate the General Assembly and the people of the State of  
8 Illinois on the issue of prison-based gerrymandering and the  
9 need to correct how the State's prisoners are counted for  
10 purposes of population; and

11           WHEREAS, Various State and federal funds are distributed  
12 based on the population of municipality or unit of government;  
13 and

14           WHEREAS, The communities from where incarcerated  
15 individuals come from and return to after prison bear great  
16 cost in providing services to these individuals for their  
17 reintegration into the community; and

18           WHEREAS, The communities from where incarcerated  
19 individuals come from must bear these costs without funding  
20 that accurately reflects their population; and

1           WHEREAS, The General Assembly has given the Commission on  
2 Government Forecasting and Accountability the responsibility  
3 of conducting special economic and fiscal studies as it deems  
4 appropriate or desirable or as the General Assembly may  
5 request; therefore, be it

6           RESOLVED, BY THE SENATE OF THE NINETY-EIGHTH GENERAL  
7 ASSEMBLY OF THE STATE OF ILLINOIS, that the Commission on  
8 Government Forecasting and Accountability is directed to  
9 conduct a study examining the fiscal impact realized from  
10 transferring an incarcerated individual from his or her  
11 physical address of incarceration to their last known physical  
12 address prior to incarceration for population purposes; and be  
13 it further

14           RESOLVED, That the Illinois Department of Corrections and  
15 any other agencies or entities having information relevant to  
16 this study cooperate fully and promptly with the Commission on  
17 Government Forecasting and Accountability; and be it further

18           RESOLVED, That the Commission on Government Forecasting  
19 and Accountability commence this study and issue their final  
20 report to the General Assembly by July 1, 2014.

## **BACKGROUND**

The Commission on Government Forecasting and Accountability (CGFA), a bipartisan, joint legislative commission, provides the General Assembly with information relevant to the Illinois economy, taxes and other sources of revenue and debt obligations of the State. The Commission's specific responsibilities include:

- 1) Preparation of annual revenue estimates with periodic updates;
- 2) Analysis of the fiscal impact of revenue bills;
- 3) Preparation of "State Debt Impact Notes" on legislation which would appropriate bond funds or increase bond authorization;
- 4) Periodic assessment of capital facility plans;
- 5) Annual estimates of public pension funding requirements and preparation of pension impact notes;
- 6) Annual estimates of the liabilities of the State's group health insurance program and approval of contract renewals promulgated by the Department of Central Management Services;
- 7) Administration of the State Facility Closure Act.

The Commission also has a mandate to report to the General Assembly ". . . on economic trends in relation to long-range planning and budgeting; and to study and make such recommendations as it deems appropriate on local and regional economic and fiscal policies and on federal fiscal policy as it may affect Illinois. . . ." This results in several reports on various economic issues throughout the year.

The Commission publishes several reports each year. In addition to a Monthly Briefing, the Commission publishes the "Revenue Estimate and Economic Outlook" which describes and projects economic conditions and their impact on State revenues. The "Bonded Indebtedness Report" examines the State's debt position as well as other issues directly related to conditions in the financial markets. The "Financial Conditions of the Illinois Public Retirement Systems" provides an overview of the funding condition of the State's retirement systems. Also published are an Annual Fiscal Year Budget Summary; Report on the Liabilities of the State Employees' Group Insurance Program; and Report of the Cost and Savings of the State Employees' Early Retirement Incentive Program. The Commission also publishes each year special topic reports that have or could have an impact on the economic well being of Illinois. All reports are available on the Commission's website.

These reports are available from:
