SUBJECT MATTER: HB 4759 amends the State Employee and Downstate Teacher Articles of the Illinois Pension Code to allow a State policeman who has more than 20 years of creditable service under the Teachers' Retirement System of the State of Illinois to elect to establish eligible service credit under the alternative formula of SERS. In addition, HB 4759 includes language to comply with provisions concerning new benefit increases.

FISCAL IMPACT: The fiscal impact of HB 4759 cannot be calculated as the amount of State policemen who may wish to establish eligible creditable service under the alternative formula of SERS is unknown.

COMMENT: Currently, there is no clause that allows a State policeman who has service credit under the Teachers' Retirement System of the State of Illinois to elect to establish creditable service under SERS' alternative formula. HB 4759 amends the State Employee and Downstate Teacher Articles of the Illinois Pension Code to provide that a State policeman who has more than 20 years of creditable service under TRS may elect to establish eligible creditable service under SERS' alternative formula by filing a written election with the Board within 2 weeks after the effective date of this amendatory Act and paying to the System an amount to be determined by the Board equal to:

- (i) the difference between the amount of employee and employer contributions transferred to the System and the amounts that would have been contributed had such contributions been made at the rate applicable to State policemen; plus
- (ii) the interest compounded annually from the date of service to the date of payment.

In addition, HB 4759 states that the General Assembly finds this amendment that allows certain State policemen to transfer service credit with TRS to SERS as alternative formula credit constitutes a new benefit increase. Funding for this new benefit increase will be provided by employee contributions.

HB 4759 clarifies that participation in TRS will be terminated on the date when credits are transferred to SERS.
