INTRODUCTION

The following document is a collection of data, tables, and graphs highlighting the results of the 2020 Census. This data, which was collected by the Census Bureau during 2020, was delayed in its release partly due to the COVID-19 pandemic, and was first released in terms of apportionment results in April 2021. After this initial release, the Bureau has periodically published additional data with further detail. Operational quality details, including housing unit information and the size of occupied units, was released in May 2021. Redistricting data, which included additional state, county and local counts, were released in August 2021, with other income related data released in July/August 2022. Although additional 2020 census data will continue to be released by the U.S. Census Bureau over the next few years, the Commission has decided to take the data currently available and compile it into an Illinois specific demographic report now, in order to provide as much Census data as possible in a reasonably timely manner.

As always, one of the most important aspects of the U.S. census is that the new population figures determine the number of seats a state occupies in the U.S. House of Representatives. The original 2020 census results, upon which apportionment of seats in the House of Representatives was determined for the 2022 election and onward, was 12,822,739 individuals from Illinois (including overseas populations, such as military, etc.) or 12,812,508 residents. This suggested a decline of 41,641 individuals from 2010 (12,864,380, or 12,830,632 residents). As a result of this count, Illinois' number of apportioned U.S. representatives was reduced from 18 to 17, following similar results in 2010, where the number of apportioned representatives was reduced from 19 to 18.

In May 2022, the US Census Bureau released results from its 2020 Post-Enumeration Survey (PES), which showed that Illinois was one of six states that had their population counts undercounted in the 2020 census. Eight other states were overcounted. The survey showed that Illinois' 2020 population was undercounted by approximately 1.97 percent. Accordingly, rather than a decline of approximately 18,000 residents, the PES shows that Illinois' population grew by almost 262,000 residents. [The survey does not specify the location of these 262,000 residents]. Despite this undercount, the Census Bureau assessed "that the 2020 Census was fit for the purposes of apportionment and redistricting upon their release and after rigorous quality review protocols, and that assessment remains valid".

The use of the PES data and its resulting growth of 262,000 residents enables Illinois to avoid the "stigma" of being seen as a "declining population state". However, the fact remains that Illinois' rate of growth, whether it be a 0.1% decline (initial release) or 2.0% increase (PES), is still well below the national average growth rate of 7.1%. Furthermore, even if the PES figures were used, Illinois' number of apportioned U.S. representatives would have still been reduced to 17.

The Bureau states that the results of the PES "cannot be used to change the final census count but are useful in assessing the current census, determining how best to estimate the population between now and 2030, and helping to improve future censuses". As such, the 2020 data released by the Census Bureau are not altered by the PES findings. Therefore, the county and municipality specific data and tables included in this report are based on the initial census figures and not PES adjusted (unless noted otherwise).

Based on initial 2020 census figures, Illinois county populations primarily increased in the collar county area as well as Cook County. Carroll, McLean, Champaign, Effingham, Monroe, Williamson and Johnson County also experienced an increase in population from 2010. Kendall County continued to grow significantly at 14.9% from the 2010 census to the 2020 census. The Chicago metropolitan area grew by 1.7% or 157,397 individuals, while the Quad Cities, Bloomington, Champaign, and St. Louis areas also had positive growth between 2010 and 2020. The Rockford, Kankakee, Peoria, Danville, Springfield, Decatur, and Carbondale metropolitan areas diminished from 2010, in comparison.

The following informational report provides numerous tables and charts that assist in identifying where the population shift is occurring. This report is broken down into multiple sections. The first section looks at the census data from a national perspective, which shows how Illinois' population changes compare to the nation and to other states across the country. The second section provides a Statewide perspective of Illinois' 2020 demographic data based on available information, including a limited profile of Illinois' general population. Also included in this section are Statewide income and benefits data as provided by the U.S. Census Bureau and the 2020 American Community Survey.

The third section looks at the Illinois data from a county-by-county perspective. This section helps identify the areas of the State that are seeing the largest change in the demographic data over the last decade. The final section displays the 2020 Census population by municipality, allowing the reader to see how the population of their hometown has changed over the last ten years.

At the opening of each section are dot-points highlighting notable observations from the provided tables and charts. All of the core data come from <u>www.census.gov</u>. Tables and charts were compiled by the Commission, obtained directly from the Census Bureau's website, or modified from other reputable sources.

I. A National Perspective

Highlights:

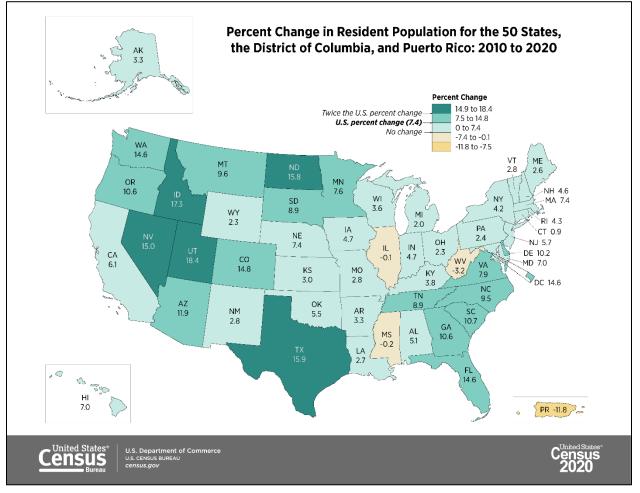

- Over the past decade, the United States' resident population grew 7.4%, reaching 331.4 million people in 2020. The largest increases came from the South (10.2%) and the West (9.2%) regions. The Midwest (3.1%) and the Northeast regions (4.1%) continued to see more modest increases.
- It must be noted that state population numbers should be taken within the context of the aforementioned PES adjustments, which affects state-to-state comparisons, especially in the case of larger states. The states most affected by the undercounting are: Arkansas (5.04%), Florida (3.48%), Illinois (1.97%), Mississippi (4.11%), Tennessee (4.78%), and Texas (1.92%). The states most affected by overcounting are: Delaware (5.45%), Hawaii (6.79%), Massachusetts (2.24%), Minnesota (3.84%), New York (3.44%), Ohio (1.49%), Rhode Island (5.05%), and Utah (2.59%).
- Based on the initial census data, Illinois' population fell 0.1% over the last decade to a 2020 total of 12.8 million. This dropped Illinois to the 6th largest state in terms of population behind Pennsylvania (13.0 million). Based on these figures, it was the 48th ranked state in terms of population rate of growth between 2010 and 2020, and 49th in terms of population change. However, if the PES figures are used and adjusted for its reported undercounting in the 2020 census, Illinois' population grew 2.0% over the last decade to 13.1 million. These adjusted figures would keep Illinois as the 5th largest state in terms of population. However, in terms of population rate of growth, Illinois would only improve slightly to 47th.
- In terms of population from the 2020 census, the largest state continues to be California at 39.5 million people. Rounding out the top six were Texas (29.1 million), Florida (21.5 million), New York (20.2 million), Pennsylvania (13.0 million), and Illinois (12.8 million). The lowest populated state continues to be Wyoming with 0.6 million people.
- A shifting population base has caused a reapportionment of the U.S. House of Representatives. Due to Illinois' lack of growth in comparison to other states, Illinois' number of apportioned representatives has fallen from 18 to 17. Even if the updated figures from the PES were used in calculating the apportionment, Illinois would have still lost one apportioned representative.
- Other states losing representatives are Michigan (-1), Ohio (-1), California (-1), West Virginia (-1), New York (-1), and Pennsylvania (-1). States gaining representatives include North Carolina (+1), Florida (+1), Colorado (+1), Oregon (+1), Montana (+1), and Texas (+2).
- In terms of population density, in 2020, Illinois had a density value of 230.8 people per square mile. This ranked Illinois 14th in the nation, the same as its 2010 ranking of 14th with a slightly higher density value of 231.1 people per square mile.

- The most densely populated state in 2020 (aside from the District of Columbia) was New Jersey at a value of 1,263 people per square mile. Rounding out the top five were Rhode Island (1,061), Massachusetts (901), Connecticut (745), and Maryland (636). The least dense state was Alaska at 1.3 people per square mile.
- The top five U.S. incorporated places in 2020, in terms of population, were New York City (8.8 million), Los Angeles (3.9 million), Chicago (2.7 million), Houston (2.3 million), and Phoenix (1.6 million).

TOTAL APPORTIONMENT POPULATION¹ 331,108,434

435

¹ Includes the resident population for the 50 states, as ascertained by the Twenty-Fourth Decennial Census under Title 13, United States Code, and counts of U.S. military and federal civilian employees living overseas (and their dependents living with them overseas) allocated to their home state, as reported by the employing federal agencies. The apportionment population excludes the population of the District of Columbia. The counts of overseas personnel (and dependents) are used for apportionment purposes only. ² The U.S. Census Bureau prepared these calculations using the existing size of the U.S. House of Representatives (435 members) and the Method of Equal Proportions, as

provided for in Title 2, United States Code, Sections 2a and 2b. Source: https://www.census.gov/data/tables/2020/dec/2020-apportionment-data.html

CHART 5

II. A Statewide Perspective

Highlights:

- Of the 12.8 million Illinois residents counted in the 2020 Census, those 18 years and over make up 77.6% of the State's population, with the under-18 population accounting for the remaining 22.4%. Those 65 and older make up 16% of Illinois' population. This compares to a slightly higher 16.3% of the US population.
- It should be noted that the 2020 American Community Survey (also conducted by the Census Bureau with the 2020 Census, but also subject to the aforementioned undercounting) estimated the 18+ over population to be slightly less at 77.3% and the <18 population to be slightly higher at 22.7%. These figures, and the county-by-county breakout for various age groups in Illinois can be seen in Table 12 of the County Perspective section.
- In Illinois, 65.2% of the population was in the labor force, slightly above the US figure of 63.4%. 34.8% were not in the labor force, compared to the US figure of 36.6%. 70% of Illinois families with children under 6 years of age had both parents in the labor force, compared to 66.7% nationwide. Overall, 83.1% of Illinois workers worked for a private business while 12.2% worked for a unit of government.
- According to the U.S. Census Bureau's 2020 American Community Survey, the Median family income in Illinois was \$68,428. This represents an increase from the 2010 Median family income of \$65,417. This compares favorably to the U.S. figure of \$64,994. Illinois' per capita income level was \$37,306, compared to the National figure of \$35,384.
- 93.2% of all Illinois civilian noninstitutionalized residents had health insurance coverage. In the 19-64 years of age bracket, 91.5% of employed residents had health insurance while 79.3% of unemployed residents had coverage.
- The latest survey shows that 12.0% of Illinois residents had income in the past 12 months below the poverty level (compared to 13.8% in 2010). Of those under 18 years, 16.2% fell below the poverty level at one time in the past 12 months (compared to 19.4% in 2010).
- In terms of race, White persons continue to make the majority of Illinois' population at 61.4%, though this is a significant decline from 71.5% in the 2010 Census. However, this decline is in large part due to Census classification of multi-race individuals, as compared to prior-year census tabulations. Black or African American persons comprise 14.1% in 2020, slightly down from 14.5% of the State's population in 2010. Asian persons account for 5.9% in 2020, up from 4.6% in 2010 (See Table 17). Approximately 2.3 million Illinois residents or 18.2% of the population responded in the Census to be Hispanic or Latino persons in 2020, compared to 15.8% (or 2.0 million) in 2010 (See Tables 10 and 18).

III. A County-by-County Perspective

Highlights:

- Cook County continues to be the largest county in terms of population with approximately 5.3 million people. In second was DuPage County (as in 2010) with 0.9 million people. The counties of Lake, Will, and Kane rounded out the top five as before in 2010.
- Kendall County had the largest increase (percent change) of any Illinois county between 2020 and 2010, (as was the case between 2000 and 2010), increasing 14.9% (compared to 110.4% in 2010). The comparative growth in the period from 2010 to 2020 appears to have slowed down significantly compared to the last census, as only Monroe (6.1%), Johnson (5.8%), and Grundy County (4.9%) had an increase in population of at least 4%. Cook County grew by the most people increasing their population by over 80,866 in the last decade.
- The smallest of the 102 counties, in terms of population, was once again Hardin County with a 2020 census count of 3,649 residents, compared to a 2010 census count of 4,320 residents. The county with the largest falloff (percent change) over the decade was Alexander County, which fell 36% to a 2020 population of 5,240 residents. St. Clair County lost the most people over the last decade falling -4.7% or 12,656 people.
- In terms of a county's race composition, the county with the highest composition of White persons was Jasper County at 96.9%. The county with the highest composition of Black or African American persons was Alexander County at 29.8%. The county with the highest composition of Asian persons was Champaign County at 13.2%. The county with the highest composition of people responding in the Census to be Hispanic or Latino persons background was Kane County at 32.8%.
- According to the 2020 Census, statewide, 60.2% of households lived in owner-occupied housing (37.8% of households lived in a house "owned with a mortgage or loan" and 22.4% of households were "owned without a mortgage"), while 30.6% lived in renter-occupied housing. In owner-occupied housing, the county with the highest composition of "renter occupied" households was Jackson County at 49.6%. The county with the highest composition of houses owned with a mortgage was Kendall at 65.8%. The county with the highest composition of owner-occupied households "owned without a mortgage" was Pope County at 52.6%.
- On average, according to the 2020 American Community Survey, the county with the highest component of <18 year-olds was Kendall County at 28.5% of the county's population. The county with the lowest component of <18 year-olds was Hardin County at 14.2%.
- The county with the highest component of 65 + year-olds was Pope County at 31.2% of the county's population. The county with the lowest component of 65 + year-olds was Kendall County at 10.3% of their county's population.

COMMISSION OVERVIEW

The Commission on Government Forecasting & Accountability is a bipartisan legislative support service agency responsible for advising the Illinois General Assembly on economic and fiscal policy issues and for providing objective policy research for legislators and legislative staff. The Commission's board is comprised of twelve legislators—split evenly between the House and Senate and between Democrats and Republicans. Effective December 10, 2018, pursuant to P.A. 100-1148 the former Legislative Research Unit was merged into the Commission.

The Commission has three internal units—Revenue, Pensions, and Research, each of which has a staff of analysts and researchers who analyze policy proposals, legislation, state revenues & expenditures, and benefit programs, and who provide research services to members and staff of the General Assembly. The Commission's staff fulfills the statutory obligations set forth in the Commission on Government Forecasting and Accountability Act (25 ILCS 155/), the State Debt Impact Note Act (25 ILCS 65/), the Illinois Pension Code (40 ILCS 5/), the Pension Impact Note Act (25 ILCS 55/), the State Facilities Closure Act (30 ILCS 608/), the State Employees Group Insurance Act of 1971 (5 ILCS 375/), the Public Safety Employee Benefits Act (820 ILCS 320/), the Legislative Commission Reorganization Act of 1984 (25 ILCS 130/), and the Reports to the Commission on Government Forecasting and Accountability Act (25 ILCS 10/).

- The **Revenue Unit** issues an annual revenue estimate, reports monthly on the state's financial and economic condition, and prepares bill analyses and debt impact notes on proposed legislation having a financial impact on the State. The Unit publishes a number of statutorily mandated reports, as well as on-demand reports, including the *Monthly Briefing* newsletter and annually, the *Budget Summary, Capital Plan Analysis, Illinois Economic Forecast Report, Wagering in Illinois Update*, and *Liabilities of the State Employees' Group Insurance Program*, among others. The Unit's staff also fulfills the agency's obligations set forth in the State Facilities Closure Act.
- The **Pension Unit** prepares pension impact notes on proposed pension legislation and publishes several statutorily mandated reports including the *Financial Condition of the Illinois State Retirement Systems*, the *Financial Condition of Illinois Public Pension Systems* and the *Fiscal Analysis of the Downstate Police & Fire Pension Funds in Illinois*. The Unit's staff also fulfills the statutory responsibilities set forth in the Public Safety Employee Benefits Act.
- The **Research Unit** primarily performs research and provides information as may be requested by members of the General Assembly or legislative staffs. Additionally, the Unit maintains a research library and, per statute, collects information concerning state government and the general welfare of the state, examines the effects of constitutional provisions and previously enacted statutes, and considers public policy issues and questions of state-wide interest. Additionally, the Unit publishes *First Reading*, a quarterly newsletter which includes abstracts of annual reports or special studies from other state agencies, the *Illinois Tax Handbook for Legislators*, *Federal Funds to State Agencies*, various reports detailing appointments to State Boards and Commissions, the *1970 Illinois Constitution Annotated for Legislators*, the Roster of *Illinois Legislators*, and numerous special topic publications.
