Introduction

The Commission is often asked by lawmakers how the State of Illinois compares nationally in revenue and spending categories. In response, the Commission has created the following report, *Illinois' National Rankings*. This 2024 edition is the latest in a series of updates to the initial rankings report first completed by the Commission in 2001.

This report addresses specific State revenue related topics, including current overall tax levels in Illinois, how these levels have changed in recent years, and how these levels compare to other Midwestern states. The report provides a quick guide as to how Illinois stacks up against the other 49 states in the various areas of state government financing. The information comes from a variety of sources including the U.S. Census Bureau and the Bureau of Labor Statistics.

Due to its large population size, Illinois ranks high in most areas on a total dollar basis. As shown below in Chart 1, according to the U.S. Census Bureau, Illinois ranks 6th in the nation in total population with 12.5 million people. After many years as the 5th most populous state, Illinois fell to 6th in 2017 and has remained there ever since. Pennsylvania now holds this 5th spot with nearly 13 million people. California continues to lead the country in population by a wide margin with nearly 40 million people. Rounding out the top five are Texas, Florida, and New York.

The population totals provided by the Census Bureau in recent years have come under a large degree of scrutiny from Illinois leaders. When the Census Bureau released Illinois' 2020 results, they reported Illinois with a population of 12,812,508 million residents. This figure was 0.1% below the 2010 census mark of 12,830,632. This approximate 18,000 decline in population resulted in Illinois ranking 49th out of 50 states in terms of the decade percentage change (only beating West Virginia). In May 2022, however, the U.S. Census Bureau released results from its 2020 Post-Enumeration Survey (PES), which showed that Illinois was one of six states that had their population counts undercounted in the 2020 census. The PES showed that, using the "mean interval" adjustment, Illinois' population instead grew by roughly 250,000 residents. While the use of the PES data enables Illinois to avoid the stigma of being seen as a "declining population state", the updated rate of growth of nearly 2% still places Illinois in the lower echelon (42nd) of population growth for this time period. Therefore, while a slightly better perception, Illinois continues to trail most states in population growth over the last decade.

Since the release of these figures, the Census Bureau has published annual estimates of the resident population of Illinois and other U.S. states. Their latest figure shows Illinois with a 2023 population of approximately 12.5 million (as shown in the previous graph). While this figure and its resulting decline in Illinois population seems to contradict the PES update, it remains the "official" estimate for Illinois and will be used in this report. The Commission acknowledges that the Census Bureau's population figures for Illinois lack a high degree of confidence. However, its use in this report (mainly for the purposes of calculating per-income values as discussed below) do not significantly alter most state-by-state comparisons and rankings and can be analyzed accordingly.

In terms of state-by-state comparisons, because Illinois is one of the larger states in terms of population, it is among the top ten states in nearly every category dealing with total dollars receipted or spent. Therefore, in order to get a better picture of how Illinois compares to other states, the information is provided in two formats: in total dollars and on a per-capita basis. The per-capita format is useful for comparing a highly-populated state, like Illinois, with states with much lower populations, such as neighboring Iowa (ranked 31st with approximately 3.2 million people), to account for the population discrepancy.

Whether it is better for a state to be ranked high or low in the rankings is open to interpretation. When observing revenue-related rankings on a per-capita basis, some believe that if a state is able to operate on tax rates that create relatively low per-capita figures, the better the financial situation for the people of that state. Others, however, would view low per-capita figures as missed opportunities for revenue growth, and subsequent program spending.

A similar argument holds true for the rankings dealing with government spending. Those benefiting from spending in a particular area would likely view the rankings as the higher the better. On the other hand, those who do not benefit from a specific area of spending would likely view a high ranking negatively, as spending for one source prevents monies from being allocated to other areas.

In this year's report, there are 23 different categories that compare Illinois with the rest of the nation in various financial areas. The first section looks at the amount of

government revenue collected from the various major revenue sources in the State. The second portion looks at where these revenues are spent at the State and local government level.

For each category, a table is provided which displays each state's amount, amount percapita, and specific ranking in each category. Illinois' totals are highlighted, along with the states bordering Illinois: Iowa, Wisconsin, Indiana, Kentucky, and Missouri. Ohio and Michigan are also highlighted due to their proximity to Illinois and because of their similarities to Illinois in population and in demographics. For the purpose of this report, this group of states will be considered the *Midwest Region*.

Following each table are charts displaying the figures graphically. Listed on the top of each chart ranked in total dollars is the national total amount of revenue for that particular source. For the charts shown on a per-capita basis, the overall national per-capita figure is included. Each chart also includes a history of how Illinois has ranked in a particular area over the past several years. Most of the revenue data are from 2023, unless stated otherwise. Most of the spending data are from 2022. These years are the most recent years of compiled data available from the U.S. Census Bureau at the time of this report.

Included in each category of charts is a short synopsis of Illinois' rankings. In most categories, Illinois ranks near the middle of the pack with revenue on a per-capita basis. However, there are a few charts that show Illinois at the high end of the rankings, while some show Illinois near the low end of the national rankings. Examples of this are highlighted throughout the report.

Comparing Illinois' tax revenue performance with other states can be difficult because of the various taxing structures that each state may impose. Therefore, throughout the report are state-specific tables displaying pertinent information relative to certain taxing categories. This includes several tables identifying the tax rates of states throughout the nation and how these tax rates compare to Illinois.

Repeated in this year's version of *Illinois' National Rankings* is a comprehensive section providing state-specific statistics and rankings on employment data. Despite recent improvement, Illinois' unemployment rate continues to trail other states in this category. The Commission often receives inquiries on how Illinois' employment situation – job gains and job losses by sector - compares to other states across the nation. In response, the Commission, with the assistance of information from the Bureau of Labor Statistics, has again created an extensive selection of employment data tables and rankings which assist in answering questions regarding Illinois' employment situation. This includes a historical look at Illinois jobs by sector to see which area of employment has been hurt the most over the last twenty years and how Illinois' change in employment compares nationally.

Category 1: State Government Tax Revenue

In the category of State Government Tax Revenue, Illinois had the 4th highest amount of revenues collected in 2023 and was the highest-ranked state in the Midwest Region in total dollars with a total of \$63 billion. This category is primarily composed of each state's total general funds. The Census Bureau notes, however, that it can also include "special revenue funds, sinking funds, public trust funds, bond funds, and all other special funds." The Census Bureau lists specific definitions¹ and the methodology² of what is included for each category in this report on its website.

California had the highest dollar amount overall with revenues totaling \$220.6 billion. On a per-capita basis, Illinois ranked 13th in the nation with an amount of \$5,019 per capita. Illinois' value was higher than the national per-capita rate of \$4,275. North Dakota had the highest per-capita ranking in 2023 with an amount of \$7,716 per capita.

| Iowa | \$13.0 | 34 | \$4,043 | 28 | South Carolina | \$15.6 | 27 | \$2,912 | 45 |
| Kansas | \$13.1 | 33 | \$4,468 | 18 | South Dakota | \$2.6 | 50 | \$2,860 | 46 |
| Kentucky | \$17.2 | 25 | \$3,804 | 31 | Tennessee | \$23.8 | 18 | \$3,342 | 39 |
| Louisiana | \$15.5 | 28 | \$3,389 | 38 | Texas | \$86.8 | 3 | \$2,845 | 47 |
| Maine | \$6.4 | 42 | \$4,614 | 17 | Utah | \$13.5 | 32 | \$3,947 | 30 |
| Maryland | \$29.7 | 17 | \$4,805 | 16 | Vermont | \$4.5 | 46 | \$6,948 | 3 |
| Massachusetts | \$41.6 | 8 | \$5,942 | 9 | Virginia | \$37.1 | 13 | \$4,259 | 24 |
| Michigan | \$37.1 | 12 | \$3,699 | 34 | Washington | \$38.0 | 11 | \$4,867 | 15 |
| Minnesota | \$34.5 | 14 | \$6,008 | 8 | West Virginia | \$7.6 | 38 | \$4,316 | 23 |
| Mississippi | \$10.3 | 36 | \$3,514 | 36 | Wisconsin | \$23.7 | 19 | \$4,017 | 29 |
| Missouri | \$17.4 | 24 | \$2,801 | 48 | Wyoming | \$3.3 | 48 | \$5.730 | 10 |

Illinois' total dollar ranking in this category has remained relatively stable over the past decade, hovering between 4th and 6th in the nation. This is despite a variety of changes to Illinois' tax structure in recent years, including an income tax rate increase in 2017 (which followed a statutory rate decrease in 2015), and rate increases in the areas of cigarette tax, the motor fuel tax, and motor vehicle fees in 2019. However, these tax changes have caused some movement in Illinois' per-capita ranking in recent years. After a 2014 per-capita ranking of 14th, Illinois' ranking fell to near the middle of the pack at

¹. <u>https://www.census.gov/programs-surveys/gov-finances/about/glossary.html</u>

². <u>https://www2.census.gov/programs-surveys/stc/technical-</u>

documentation/methodology/2023stcmethodology.pdf

22nd in 2019. But once the aforementioned tax increases took full effect, Illinois' percapita ranking in this category has again shifted towards the upper quadrant of rankings, with the most recent ranking of 13th in 2023.

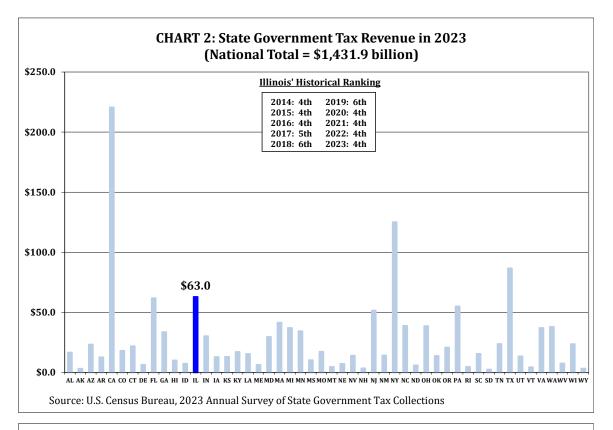

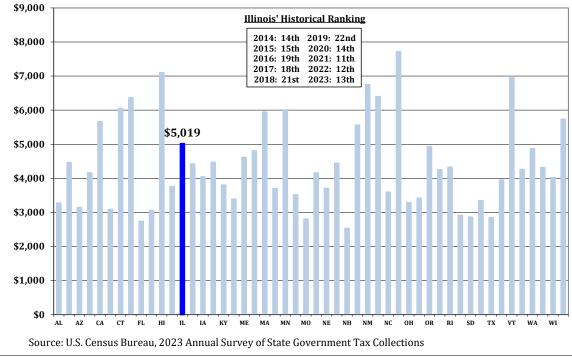

CHART 3: Per-Capita State Government Tax Revenue in 2023 (National Per Capita = \$4,275)

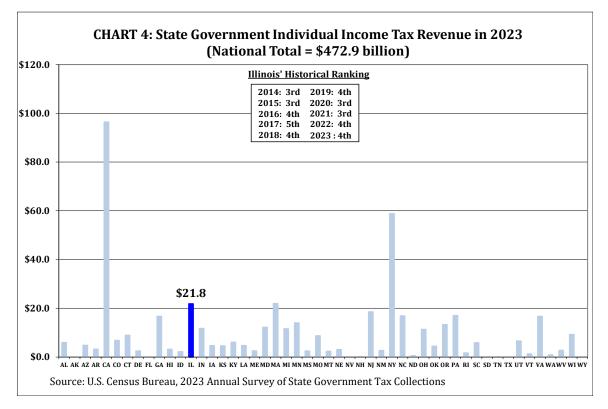

Category 2: State Government Individual Income Tax Revenue

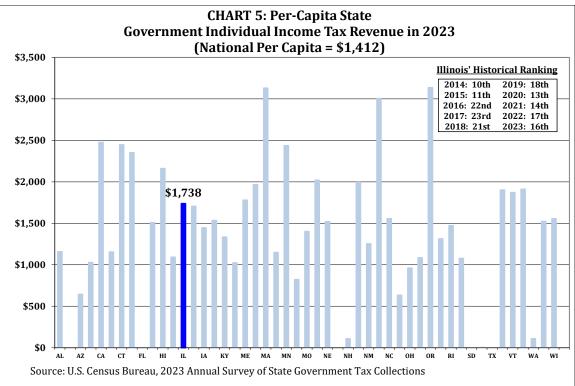

Illinois ranked 4th in the nation in the amount collected from state government individual income taxes in 2023 with a total amount of \$21.8 billion. On a per-capita basis, Illinois ranked 16th. Illinois' per-capita rate of \$1,738 was above the national average of \$1,412, but remains well below the 1st ranked state in this category, Oregon, at \$3,136 per capita.

| Mississippi | \$2.4 | 36 | \$821 | 39 | Wisconsin | \$9.2 | 16 | \$1,555 | 19 |
| Missouri | \$8.7 | 18 | \$1,401 | 26 | Wyoming | | No Incor | ne Tax | |

As shown in Chart 4, there has not been much movement in Illinois' total dollar ranking in this category over the last several years.

Statutorily, the individual income tax rates fell to 3.75% from 5% on January 1, 2015. This decline in the tax rates significantly lowered the amount generated from the individual income tax over the next two fiscal years, causing Illinois' per-capita ranking to fall to 22nd in 2016 and to 23rd in 2017. However, these rankings have since increased to the 2020 ranking of 13th because in July 2017, P.A. 100-0022 increased the personal income tax rate to 4.95%. Since then, Illinois' per-capita ranking has moved down a few spots. A list of the 2024 personal income tax rates for all of the states is shown in Table 3.

Category 3: State Government Corporation Net Income Tax Revenue

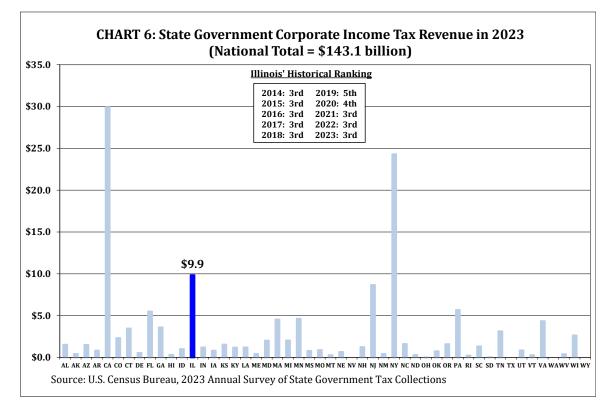

Illinois collected \$9.9 billion in corporate income tax receipts in 2023, which ranked 3rd in the nation in this category. Again, California had the highest total with \$29.9 billion. On a per-capita basis, Illinois ranked 6th with a per-capita rate of \$786, notably higher than the national per-capita rate of \$427. Illinois' per-capita value was the highest in the Midwest Region.

Illinois' rankings have remained fairly stable over the past decade. The only tax rate changes in the past decade were lowering the rate from 7% to 5.25% in January 2015 and then permanently increasing the rate to 7% in July 2017.

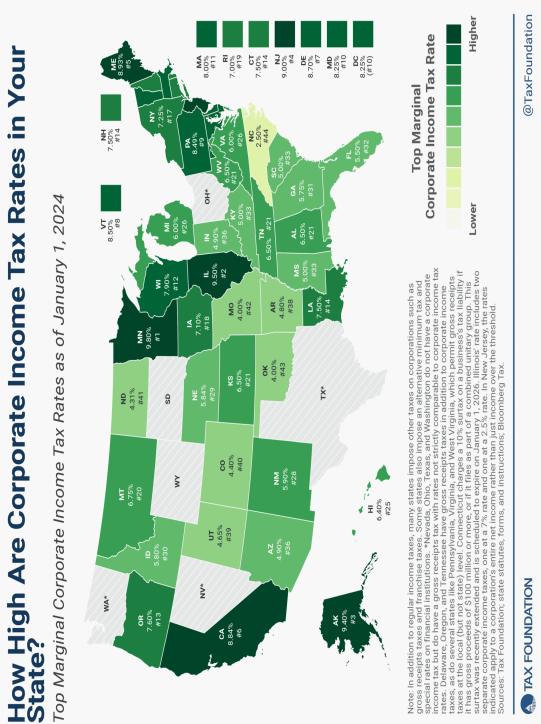

In the 2014 Annual Survey of State Government Tax Collections, Illinois had the 4th highest per-capita ranking. In 2018 and 2019, this per-capita ranking decreased to 10th. The per-capita ranking has since increased to 6th.

Table 5, on page 8, displays each state's corporate income tax rate as of January 1, 2024. Illinois is one of twenty-nine states with a flat tax. Illinois' current rate of 9.5%, which includes the State's rate of 7.0% and the corporate replacement tax rate of 2.5%, places Illinois as having one of the highest corporate income tax rates in the country. The map on page 9, as provided by the Tax Foundation, illustrates this point.

Category 4: State Government General Sales Tax Revenue

General sales tax revenue, under this category, does not include special sales taxes such as those on sale of alcohol, gasoline, or tobacco. In 2023, Illinois ranked 7th in the amount of sales tax revenue collected with a total of \$15.5 billion. Texas collected the most, generating \$53.7 billion. On a per-capita basis, Illinois ranked 31st in the nation with a value of \$1,235, which was below the national average per-capita value of \$1,375. As shown in Table 7 below, in the Midwest Region, only Missouri (44th) ranked lower than Illinois on a per-capita basis.

The last State sales tax rate increase (from 4% to 5%) occurred in 1984. Illinois' sales tax rate is typically shown as 6.25%, in which 5% goes to the State, and the remaining 1.25% goes to local governments. When the combined rate of 6.25% took effect in 1990, a 1% state tax was imposed on food and drugs. Table 8 lists the sales tax rates for all of the states. Illinois is currently the only State to impose a sales tax on prescription drugs and is one of only a handful of states to impose a sales tax on groceries. However, Illinois has since repealed the State-level 1% sales tax on groceries. This repeal goes into effect on January 1, 2026.

Illinois law also authorizes local governments to impose sales taxes, so the sales tax in many communities is often higher than 6.25%. For example, the City of Chicago currently has an overall sales tax rate of 10.25% when encompassing all of the local sales taxes (6.25% State, 1.75% County Home Rule, 1.25% Home Rule, 1.0% Regional Transportation Authority). Portions of suburban Cook County impose a combined rate

of 11%. The rate imposed can vary even in the same city as sections of cities can have a higher sales tax.

Note: City, county and municipal rates vary. Local rates are weighted by population to compute an average local tax rate.

(a) Three states levy mandatory, statewide, local add-on sales taxes at the state level: California (1.25%), Utah (1.25%), and Virginia (1%). We include these in their state sales tax.

(b) The sales taxes in Hawaii, New Mexico, and South Dakota have broad bases that include many business-to-business services.

(c) Special taxes in local resort areas are not counted here.

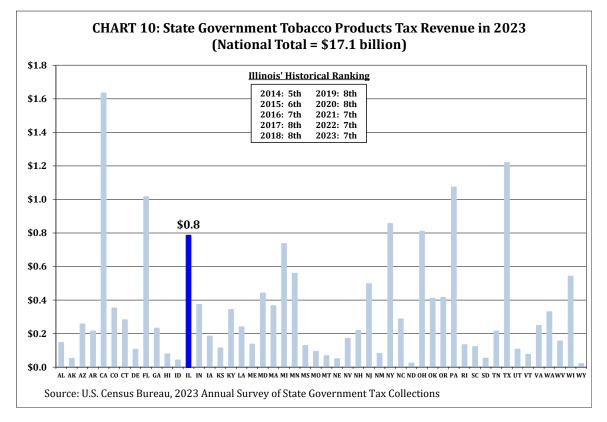

(d) Salem County, N.J., is not subject to the statewide sales tax rate and collects a local rate of 3.3125%. New Jersey's local score is represented as a negative.

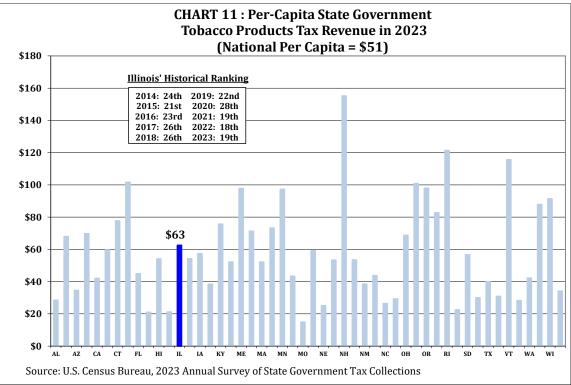

Category 5: State Government Tobacco Product Sales Tax Revenue

In the category of State Government Tobacco Product Sales Tax Revenue, which is mostly comprised of cigarette tax revenues, Illinois ranked 7th in total sales in 2023 with a total of \$785 million. California ranked 1st generating \$1.6 billion. On a per-capita basis, Illinois ranked 19th with a value of \$63 per capita. New Hampshire is the highest-ranked state on a per-capita basis with a value of \$155.

Illinois increased their cigarette tax from \$1.98 to \$2.98 per pack in 2019. In terms of the tobacco products tax, Illinois' tax is equal to 15% of the wholesale price (distributor's cost price for the products) for electronic cigarettes; 36% of the wholesale price for other tobacco products like cigars and chewing tobacco; and 30¢ per ounce for moist snuff.

As shown below, Illinois' current cigarette tax rate is \$2.98 per pack which ranks as the 12th highest in the nation. New York has the highest tax rate in the country, as of June 30 2024, with a rate of \$5.35 per pack.

In addition to the State cigarette tax, Illinois law authorizes a municipal cigarette tax of 1-cent per package of 20 cigarettes, but it cannot be imposed by municipalities for which the state already collects a municipal home-rule retailers' occupation (sales) tax. Home-rule units can collect their own cigarette taxes.

For example, Chicago collects \$1.18 per pack of 20 cigarettes, and Cook County collects \$3.00. Chicago's combined rate, when including city, county, State, and federal taxes is \$8.17 per pack of 20 cigarettes. This ranks Chicago as having one of the highest combined tax rates of any city in the nation.

Category 6: State Government Alcoholic Beverage Sales Tax Revenue

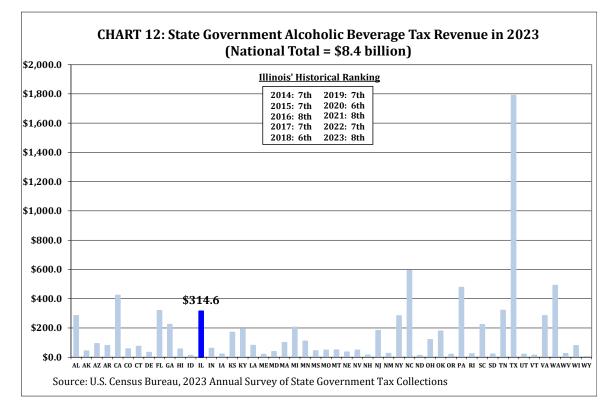

In 2023, in the category of State Government Alcoholic Beverage Sales Tax Revenue, Illinois ranked 8th in total sales with a total of \$314.6 million. Texas ranked 1st generating \$1.789 billion. On a per-capita basis, Illinois ranked 17th in the nation with a value of \$25 per capita. Washington is the highest-ranked state on a per-capita basis with a value of \$63 per capita.

In the Midwest region, Illinois collects the highest amount of tax revenue from alcoholic beverages from a total dollar's perspective. On a per-capita basis, Illinois is only behind Kentucky in the Midwest. Kentucky is ranked 10th in the nation with a per-capita value of \$43.

As shown in the charts on the following page, Illinois' latest rankings have barely changed since 2014, as the total dollar ranking has only risen from 7th to 8th, and the per-capita ranking has remained 16th or 17th over the past ten years. The last tax increase on alcoholic beverages was in September 2009 when the rate and base of Illinois liquor tax was increased to the following amounts (per gallon): \$0.231 on beer and cider (up from \$0.185); \$1.39 on wine (up from \$0.73); and \$8.55 on distilled liquor (up from \$4.50).

Table 12 on page 18 displays a list of each state's tax rate on beer; as shown, Illinois currently has the 28th highest tax rate on beer in the country.

(a) Statewide local rates exist in Alabama (\$0.52/gallon) and Georgia (\$0.53/gallon).

(b) Includes sales taxes specific to alcoholic beverages.

(c) Includes case fees and/or bottle fees which may vary with the size of container.

(d) Different rates also applicable according to alcohol content, place of production, size of

container, or place purchased (on- or off-premise or onboard airlines).

(e) Includes the wholesale tax rate in Kentucky (10%) and Tennessee (\$35.60 per barrel),

converted into a gallonage excise tax rate.

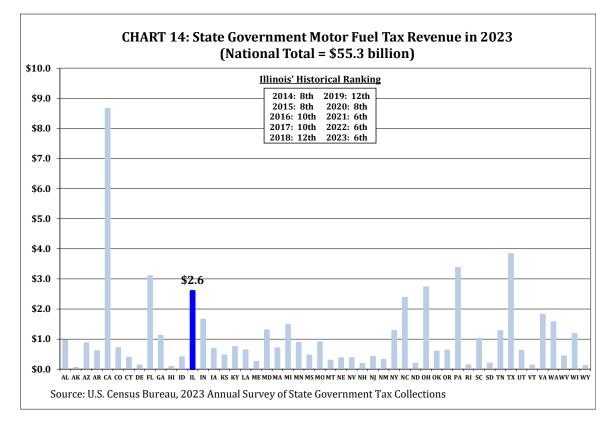

Category 7: State Government Motor Fuel Tax Revenue

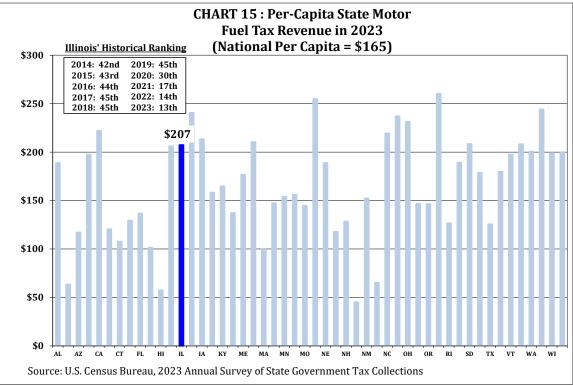

In 2023, Illinois ranked 6th in the nation in the amount of motor fuel tax revenue collected with a total of \$2.6 billion. Only Ohio collected more in the Midwest Region (\$2.7 billion). However, on a per-capita basis, Illinois ranked 13th in the nation in 2023 with a per-capita rate of \$207, which was higher than the national per-capita rate of \$165. Illinois was the 4th highest ranking state on a per-capita basis in the Midwest Region.

A 2019 law raised the motor fuel tax rate on gasoline from \$0.201 to \$0.391 and diesel fuel from \$0.226 to \$0.466. The law also included a provision that the taxes on gasoline and special fuels were to be increased each July 1 by an amount equal to the percentage increase, if any, in the Consumer Price Index for All Urban Consumers for the 12 months through March of that year. This tax rate increase raised Illinois' per-capita ranking from 45th in 2019 to 30th in 2020, and has since increased to a 2023 ranking of 13th. The most recent motor fuel tax increase on July 1, 2024, increased the motor fuel tax on gasoline/gasohol from \$0.454 to \$0.470 per gallon (or 48.1 cents when including environmental fees). As shown on page 21, as of January 1, 2024, Illinois had the 2nd highest rate in the country.

It must be noted that Illinois is among eight states that collect general sales taxes on motor fuel as well (including Indiana and Michigan in the Midwest). These revenues would be included in the sales tax figures and not in the tables and graphs shown in this section.

Category 8: State Government Motor Vehicle Tax Revenue

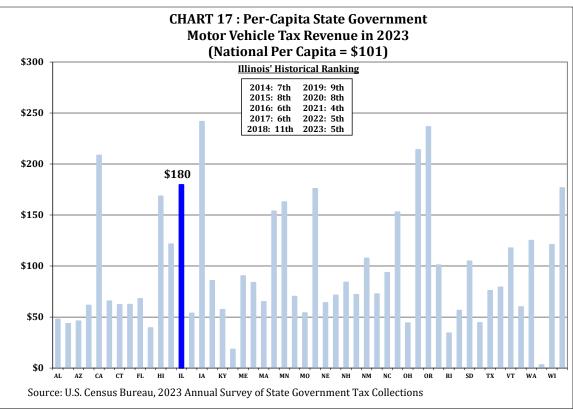

In 2023, Illinois collected the 3rd highest amount of tax revenue from motor vehicles. Illinois' total amount of \$2.3 billion trailed only California (\$8.1 billion) and Texas (\$2.3 billion) in this category. Illinois had the 5th highest per-capita ranking in this category, collecting \$180 per capita, which was well above the national per-capita value of \$101. Only Iowa (ranked 1st) had a higher ranking than Illinois in the Midwest Region at \$242 per capita.

The State imposes a wide variety of fees on operators of motor vehicles in Illinois. These fees are administered by the Secretary of State. On January 1, 2020, many of these fees were increased by way of P.A. 101-0032. This includes a \$50 increase in passenger vehicle registrations from \$98 to \$148 per year; an increase in electric vehicle registration fees from \$35 every two years to \$248 per year; an increase in the cost to register numerous other large trucks and trailers by \$100; and an increase in the cost for a vehicle certificate of title from \$95 to \$150 for cars and \$250 for motor homes and campers. If an electric vehicle owner requests it, they may register under another vehicle designation, paying that fee plus a \$100 surcharge for their electric vehicle.

Additional vehicle taxes may come from local governments. According to the *Illinois Tax Handbook for Legislators*, "State law allows any municipality to tax motor vehicles owned by its residents at rates set by its governing body (65 ILCS 5/8-11-4). Home-rule units can tax motor vehicles that are registered in their jurisdictions, as some do."

Category 9: State Government Insurance Premium Tax Revenue

In 2023, Illinois ranked 18th in the nation in the amount of insurance tax revenue collected with a value of \$547.2 million. Only Ohio (12th) collected more in the Midwest Region. On a per-capita basis, Illinois ranked 47th in the nation with a value of \$44, well below the national average of \$97. Only Wisconsin (48th), Indiana (49th) and Oregon (50th) had lower per-capita rates than Illinois. Louisiana had the highest per-capita rate at \$269.

Illinois imposes a number of taxes and fees on insurance companies, including a privilege tax on foreign companies, fire-marshal taxes, and a surplus line produce tax on nonstandard policies. The rate and base of the insurance taxes and fees in Illinois, as provided in the Commission's *Illinois Tax Handbook for Legislators*, are as follows:

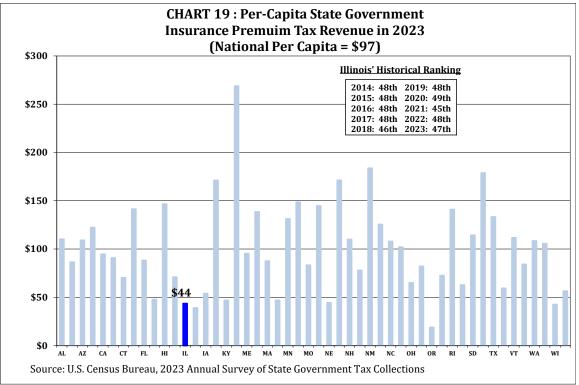

- 1) Privilege tax on insurers and HMOs:
 - a) 0.4% of net taxable written premiums for accident and health insurance.
 - b) 0.5% of net taxable written premiums for all other types of insurance.
- 2) Fire Marshal's tax: 1% of premiums on fire or fire-related insurance policies.

3) Surplus line producers' tax: 3.5% of gross insurance premiums from policies issued in Illinois. "Industrial insureds" (businesses meeting minimum requirements for size or annual revenues) that buy insurance from insurers not authorized to do business in Illinois pay 0.5% of gross premiums, plus the fire marshal's tax.

4) Workers' Compensation Commission Operations Fund Surcharge: 1.01% of direct written premiums for workers' compensation liability insurance.

5) Numerous other fees on particular types of insurance activities.

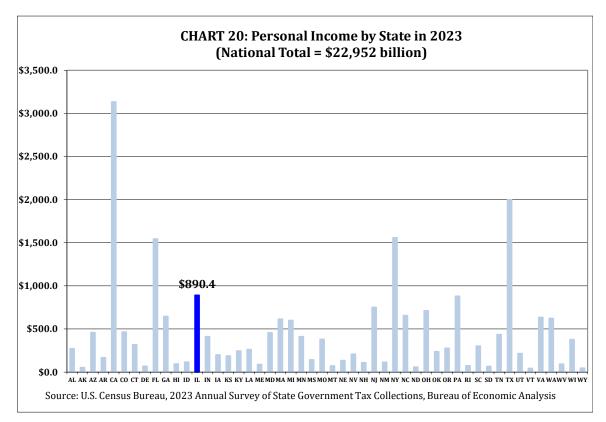

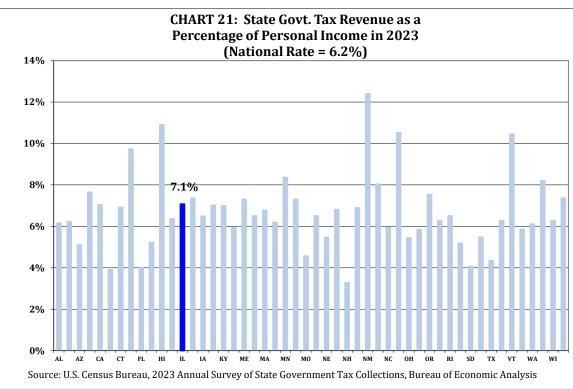

<u>Category 10: State Government Tax Revenue as a Percent of Personal</u> <u>Income</u>

As shown in Table 17, Illinois ranked 15th in the nation in 2023 in the category of state government tax revenue as a percentage of personal income with a value of 7.1%. In 2023, the national average percentage was 6.2%. The highest-ranking state was New Mexico at 12.4%.

The statutory lowering of the income tax rates in 2015 caused Illinois' ranking to slide to 33rd for this category in 2017. The impact of recent tax increases (income tax, cigarette tax, motor fuel tax, vehicle fees, etc.) raised Illinois' ranking in this category to its current spot of 15th.

Note: The charts above do not include a historical ranking display because the source used to calculate these amounts are different than what is used throughout the remainder of the report.

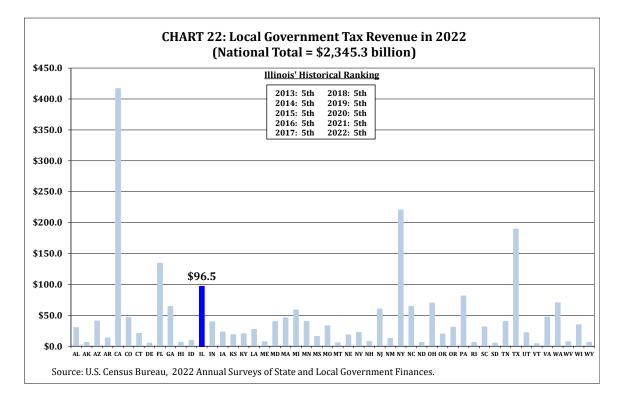

Category 11: Local Government Tax Revenue

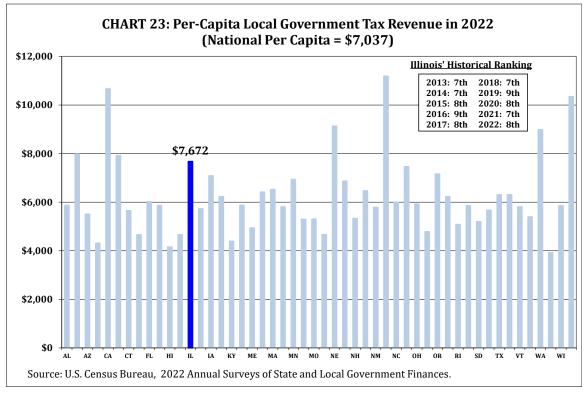

In 2022 (the most recent year of compiled data available for local government revenues), Illinois ranked 5th in the nation in the category of local government tax revenue collected with an amount of \$96.5 billion. California was ranked 1st with an amount of \$416.2 billion. On a per-capita basis, Illinois ranked 8th at \$7,672 per capita and was the highest-ranked state in the Midwest Region. New York was first at \$11,186 per capita. A major reason for Illinois' high rankings in this area is because Illinois has more units of government (over 8,000³) than any other state in the nation.

Because Illinois' ranking in per-capita local government revenue is higher than its ranking in state government revenue, many argue that the State should take a larger role in financing programs. They argue that local taxes need to be lowered, while increasing State tax sources to create a more "equitable" system. Others argue that a reliance on property taxes gives local governments more local control and promotes a higher degree of accountability to their community. This debate will continue in the years to come, especially in the area of education funding.

Category 12: Local Government Property Tax Revenue

The majority of local taxes come from the property tax. Illinois has historically been one of the highest property taxing states in the nation. As shown below in Table 19, in 2022, Illinois ranked 6th in the nation in the amount of property tax revenue collected. It was also the highest-ranked state in the Midwest in terms of total dollars. On a per-capita basis, Illinois also ranked 6th and was the highest-ranked state in this category in the Midwest Region. Illinois' per-capita rate was \$2,606, which was well above the national average of \$1,883.

Category 13: State and Local Government Total Expenditures

In terms of State and Local Government Total Expenditures, Illinois ranks 5th in total dollars and ranks 18th in terms of per-capita spending. Total expenditures, in this instance, include all money paid other than for retirement of debt and extension of loans. It includes payments from all sources of funds including current revenues and proceeds from borrowing and prior year fund balances. It also includes intergovernmental transfers and expenditures for government owned utilities and other commercial or auxiliary enterprise and insurance trust expenditures. Illinois' per-capita spending rate was \$13,299, which was just above the national average rate of \$12,903. Illinois had the highest amount of total expenditures in the Midwest in total dollars and on a per-capita basis.

<u>Category 14: Elementary and Secondary Education Expenditures by State</u> <u>and Local Governments</u>

Illinois ranked 4th in the nation in the amount spent on elementary and secondary education in 2022 with an amount of \$39.4 billion. This includes money from state <u>and</u> local governments (property tax revenues). California was the highest-ranked state with a total expenditure amount of \$109.2 billion. On a per-capita basis, Illinois ranked 6th at \$3,130 per capita, which was above the national average of \$2,499. New York was the highest-ranked state on a per-capita basis at \$4,198. Illinois had the highest per-capita ranking in the Midwest.

Category 15: Source of Elementary and Education Funding

On the following page is a table displaying the amount of revenue used for the financing of elementary and secondary education by state. The table shows how much of the education funding came from federal sources, state sources, and from local sources for Fiscal Year 2022. A closer look shows that 49.4% of Illinois' portion of education funding in this year came from local sources, 39.9% came from state sources, and 10.7% came from federal sources.

Illinois' local government portion of elementary and secondary education is among the highest in the nation. In the year shown, Illinois ranked 12^{th} in the nation. Illinois ranks 3^{rd} in the Midwest after Ohio (6th) and Missouri (9th).

Note: The Census Bureau adds the following footnote regarding Illinois' data: "Payments made by the state government into the state's public school retirement systems on behalf of Illinois school districts are included in the tables that display state totals of elementary-secondary education finances. These payments have been estimated for local school systems and appear in the tabular detail for state revenue and expenditure of individual school systems. Illinois corporate personal property replacement tax revenue is included as a state revenue source rather than local revenue in the summary tables and data files."

TABLE 22: Summary of Public Elementary-Secondary

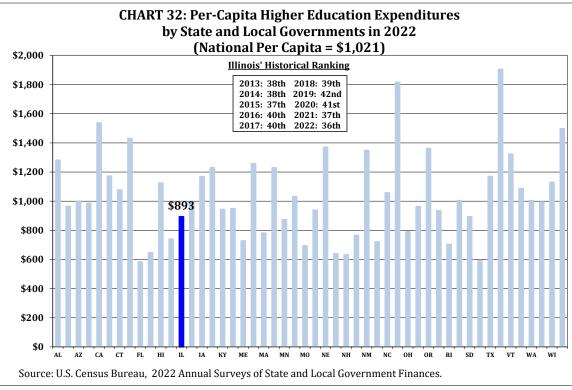

www.census.gov/data/tables/2022/econ/school-finances/secondary-education-finance.html

Category 16: Higher Education Expenditures by State and Local Governments

In the category of higher education expenditures, Illinois ranked 8th in the nation, spending \$11.2 billion in 2022. Again, this includes money from local and state governments. California was the highest-ranked state with a total expenditure amount of \$60 billion. On a per-capita basis, Illinois ranked 36th at \$893 per capita, which was below the national per-capita value of \$1,021. Utah was the highest-ranked state on a per-capita basis at \$1,905. In the Midwest Region, only Ohio (38th) and Missouri (45th) had a lower ranking than Illinois.

<u>Category 17: State and Local Government Expenditures for Police Protection</u></u>

In 2022, Illinois ranked 5th in the nation in the amount of state and local government expenditures for police protection with a total of \$6.2 billion. California ranked 1st with a total of \$24.2 billion. On a per-capita basis, Illinois ranked 8th in the nation with a value of \$493 per capita, above the national average of \$420. Illinois was the highest-ranked state in the Midwest Region in total dollars and on a per-capita basis. The highest-ranked state on a per-capita basis was California with a per-capita value of \$621.

Category 18: State and Local Government Expenditures for Corrections

Illinois is ranked 9th in the nation in the amount of state and local government expenditures for corrections in 2022, spending \$2.5 billion. California ranked 1st spending \$17.9 billion. On a per-capita basis, Illinois ranked 38th with a value of \$199 per capita, which was below the national per-capita rate of \$274. The highest-ranked state on a per-capita basis was Alaska with a per-capita value of \$613.

Illinois' ranking on a per-capita basis had steadily declined over the past few decades. Illinois was ranked 29th in 1997, 38th in 2004, 43rd in 2006, and fell to as low as 48th in 2016. However, the trend appeared to be reversing itself in the past decade as the percapita ranking rose from 42nd in 2017 to 28th in 2018, but it has since fallen again to its latest ranking of 38th. The highest-rated state in the Midwest is Wisconsin with a percapita value of \$311 and a ranking of 12th.

Category 23: State and Local Government Debt Outstanding

In 2022, Illinois ranked 4th in the nation with a total debt of \$133.9 billion. In this category, state and local government debt outstanding includes short-term, long-term, full faith and credit, non-guaranteed and public debt for private purposes. California had the highest level of debt outstanding with \$558.7 billion. On a per-capita basis, Illinois ranked 12th with a value of \$10,641. This amount was above the national average of \$9,470 per capita. Illinois has consistently been the highest-ranked state in the Midwest Region in both total dollars and on a per-capita basis over the last several years. New York had the highest per-capita value of \$17,939.

Employment Statistics and Rankings

It has been nearly five years since the COVID-19 pandemic hit the United States and the rest of the world causing significant job loss in nearly every employment sector. All but five states hit all-time high unemployment rates during 2020, the year the pandemic hit. Illinois hit a historical high unemployment rate of 18.1% during April 2020 right after having its lowest unemployment rate in December 2019 at 3.6%. While Illinois has made a significant recovery from this extremely high rate, it is still trailing other states' recoveries and remains as having one of the highest unemployment rates in the nation.

Most states have now surpassed job totals experienced prior to the COVID-19 pandemic. Illinois is no exception as its employment totals at the end of Fiscal Year 2024 hit record highs with 6.14 million jobs across the state, comprising 3.9% of the total employment in the country.

Illinois' recent job growth is, by itself, very much a positive. However, when comparing Illinois' unemployment rate and employment data with other states across the country, Illinois' performance has been poor. For example, Illinois' latest unemployment rate of 5.3% (October 2024) is above the national average of 4.1% and ranks 48th in the country for this metric. Illinois' unemployment rate trails every other state in the Midwest region and notably behind neighboring Wisconsin's rate of 2.9%, Iowa's rate of 3.0%, and Missouri's rate of 3.8%. The lowest unemployment rate in the country for October 2024 was South Dakota at 1.9%. The highest unemployment rates belonged to the District of Columbia at 5.7% and California at 5.4%. These rates can be seen on the following page.

As stated previously, Illinois' employment levels have now surpassed totals prior to the COVID-19 pandemic. Again, this fact by itself is encouraging. However, some would argue that Illinois' job recovery over the last few years has been disappointing, especially when compared to the performance of other states. The following section takes a closer look at these comparisons to put Illinois' recent job gains into context.

Questions that will be addressed in this section include, "What types of jobs has Illinois lost?", "How has Illinois' employment situation changed over the years?", and "How does Illinois' employment figures compare to other states throughout the nation?". In an effort to address these questions, the Commission compiled employment statistics from the U.S. Bureau of Labor Statistics over the last two decades. The data used in this analysis can be obtained at the Bureau's website (<u>www.bls.gov</u>).

| Note: Rates shown are a | | | | | | | | | | | |

Note: Rates shown are a percentage of the labor force. Data refer to place of residence. Series begin in January 1976. Historical highs and lows show the most recent month that a rate was recorded in the event of multiple occurrences. Estimates for at least the latest five years are subject to revision early in the following calendar year. Estimates for the current month are subject to revision the following month. Source: https://www.bls.gov/web/laus/lauhsthl.htm Comparing employment levels reported at the end of each fiscal year (June) since 2000 (non-seasonally adjusted), Illinois reached 6.1 million jobs at the beginning of the century in 2000. Illinois' employment levels fell to almost 5.4 million following the COVID-19 pandemic in 2020. Since then, Illinois has increased to its high point of nearly 6.2 million jobs in 2024. The table below displays the high points, low points, and current levels of employment for all of the states in the nation.

As shown, comparing Illinois' June 2024 figure with this "low point", employment levels have improved 12.8%. At first glance, this improvement may appear encouraging, but compared to other states, Illinois ranks 42nd in the nation in the rate of change from a state's "low point" with its current value. Only fourteen states are not at a "high point" when comparing their year-over-year June totals. Two of these states reside in the Midwest Region (Michigan: 5.2% below its high point; Ohio: 0.4% below its high point).

The next table compares the June employment figures of each state with the June employment levels of last year, and of 5, 10, 15 and 20 years ago. As shown, throughout these years of comparison, Illinois is consistently in the lower half of improvement compared to other states.

For example, although Illinois' employment levels have improved 4.6% compared to twenty years ago, this rate of growth only ranks Illinois as 44th in the nation. Only seven states have lower rates of growth. The state with the greatest improvement over this time period is Utah growing 58.6%, followed by Texas (48.5%), Idaho (45.8%), Arizona (38.3%), and Nevada (37.5%). These numbers provide evidence of the migration of jobs to the western parts of the United States over the last two decades.

Even from a more recent time-frame perspective, Illinois has struggled to recover jobs in comparison to other states. As the previous table displays, compared to a year ago (June 2024 vs June 2023), Illinois' employment figures improved 0.2%. However, this rate of growth ranked Illinois 49^{th} in the nation. Similar results are seen when comparing Illinois' numbers from five years ago (+0.2% growth, rank of 46^{th}), ten years ago (+4.5% growth, rank of 41^{st}), and fifteen years ago (+8% growth, rank of 43^{rd}). The level of job growth, or lack thereof, over the past two decades is concerning, especially as compared to the rate of growth of other states throughout the country. The following tables attempt to answer the question of which types of jobs are experiencing the greatest falloff/slow-down in Illinois.

The Bureau of Labor Statistics categorizes their employment data into 11 sectors. The latest data (as shown in the table below) shows that the Trade, Transportation, and Utilities sector had the highest composition of jobs in Illinois at 20%. This was followed by the Education and Health Services sector (comprising 16.2%) and the Professional and Business Services sector (comprising 15.1%). The table below also shows that this breakout is similar to the U.S. composition, in that the Trade, Transportation, and Utilities sector has the highest composition (18.3%) followed by the Education and Health Services sector (comprising 16.6%), and then the Government sector (comprising 14.7%).

The previous table also shows how the composition of jobs has dramatically changed over the last twenty years. For example, in 1990, the Manufacturing sector made up 17.4% of Illinois jobs and was the second largest sector of jobs in the state. The latest data shows this composition percentage has dropped to 9.4% and is now the sixth largest employment sector. Although, it should be pointed out that this trend is also occurring nationally as the Manufacturing sector has fallen from 16.1% of the U.S. total in 1990 to its current level of 8.2%.

The Education and Health Services and Professional and Business Services sectors, on the other hand, have gained the most jobs over the last two decades as their composition in Illinois has risen from 9.9% and 10.8% of the total in 1990, to their current levels of 16.2% and 15.1%, respectively. Again, a similar trend has occurred nationally as the Education and Health Services sector has increased from 9.8% of the nation's jobs to 16.6%, while the Professional and Business Services sector has increased from 9.9% to 14.5% of total employment in the U.S.

The table below looks at the Illinois data a little closer by displaying actual figures. Again, the largest sector of jobs in Illinois comes from the Trade, Transportation, and Utilities sector, employing over 1.2 million Illinois workers in June 2024. The next largest sector is the Education and Health Services sector (992,800 jobs), followed by the Professional and Business Services sector (927,400 jobs), the Government sector (836,700 jobs), Leisure and Hospitality (597,000), and the Manufacturing sector (579,100 jobs). The table displays these statistics by year over the past ten years and shows the annual change of these sectors during that same time period.

Over the past year (June 2024 vs June 2023), total employment grew 0.2% in Illinois. In terms of annual percentage growth, the largest increases came from the Other Services sector (+3.1%) and the Government sector (+2.9%). Five sectors had lower employment levels than a year ago: Information (-5.8%); Professional and Business Services (-3.1%); Financial Activities (-1.9%); Construction (-0.7%); and Trade, Transportation, and Utilities (-0.3%). These rates of annual change can be seen in the below table.

The table also identifies how these job sectors have changed over various time frames. For example, over the last ten years, eight of the eleven job sectors in Illinois have seen employment levels grow with the largest increases being Construction (+16%); Education and Health Services (+12.1%); and Leisure and Hospitality (6.9%). The largest falloff during this time frame, in terms of percentage change, came from the Mining sector (-27%), followed by the Information sector (-11.1%).

The question, then, is whether Illinois' changes in job composition are "normal" in today's employment environment or is Illinois perhaps falling behind other states in employment activity? The rankings shown below provide some insight into this question. Along with the percentage changes of the different sectors is Illinois' ranking for each of these rates of change, as it compares to other states. The answer to whether Illinois' job trends are "normal" is tricky as it depends on which sector of employment is being discussed and over what time frame.

For example, over the past year, Mining jobs have increased 1.4% in Illinois. This ranks Illinois as having the 17th highest growth rate for this sector over this time period. However, over the last ten years, Mining jobs have fallen 27%, ranking Illinois 32nd and have fallen 24.7% over the last fifteen years, ranking Illinois 38th.

As mentioned previously, manufacturing jobs throughout the country have been on a downward trend, as this sector's composition of total jobs has slowly eroded. Over the past twenty years, manufacturing jobs in Illinois have declined 17.7%, which ranks Illinois 35th in the nation for this rate of change for this time period. With that being said, there has been a slight recent uptick in manufacturing jobs over the past several years. In the past four years, employment in manufacturing in Illinois is up 5.7%. This growth is, of course, welcomed in Illinois as manufacturing jobs are typically high paying jobs. This rate of growth, however, only places Illinois as 37th in the nation during this time period for this sector of jobs as the vast majority of states have seen a larger rate of growth in manufacturing jobs than Illinois.

For Illinois' highest employing sector, the Trade, Transportation, and Utilities sector, Illinois' rate of change has consistently been in the lower half of states in the rankings of job change. Illinois slightly declined (-0.3%) in this sector over the last year, which ranked them as having the 32nd best rate of change for this time period. Compared to five years ago, Illinois' growth of 2% ranks the State 35th. Illinois ranked 32nd for this job sector compared to ten years ago, 33rd compared to 15 years ago, and 32nd compared to 20 years ago.

Numerous other comparisons could be made by looking at the previous table. Unfortunately, from an Illinois employment perspective, Illinois ranks in the lower half of job growth for most of the job sectors, especially when comparing employment levels from a decade or more ago.

COMMISSION OVERVIEW

The Commission on Government Forecasting & Accountability is a bipartisan legislative support service agency responsible for advising the Illinois General Assembly on economic and fiscal policy issues and for providing objective policy research for legislators and legislative staff. The Commission's board is comprised of twelve legislators—split evenly between the House and Senate and between Democrats and Republicans.

The Commission has three internal units—Revenue, Pensions, and Research, each of which has a staff of analysts who analyze policy proposals, legislation, state revenues & expenditures, and benefit programs, and who provide research services to members and staff of the General Assembly. The Commission's staff fulfills the statutory obligations set forth in the Commission on Government Forecasting and Accountability Act (25 ILCS 155/), the State Debt Impact Note Act (25 ILCS 65/), the Illinois Pension Code (40 ILCS 5/), the Pension Impact Note Act (25 ILCS 55/), the State Employees Group Insurance Act of 1971 (5 ILCS 375/), the Public Safety Employee Benefits Act (820 ILCS 320/), the Legislative Commission Reorganization Act of 1984 (25 ILCS 130/), and the Reports to the Commission on Government Forecasting and Accountability Act (25 ILCS 110/).

- The **Revenue Unit** issues an annual revenue estimate, reports monthly on the state's financial and economic condition, and prepares bill analyses and debt impact notes on proposed legislation having a financial impact on the State. The Unit publishes a number of statutorily mandated reports, as well as on-demand reports, including the *Monthly Briefing* newsletter and annually, the *Budget Summary, Capital Plan Analysis, Illinois Economic Forecast Report, Wagering in Illinois Update*, and *Liabilities of the State Employees' Group Insurance Program*, among others. The Unit's staff also fulfills the agency's obligations set forth in the State Facilities Closure Act.
- The **Pension Unit** prepares pension impact notes on proposed pension legislation and publishes several statutorily mandated reports including the *Financial Condition of the Illinois* State Retirement Systems, the Financial Condition of Illinois Public Pension Systems and the Fiscal Analysis of the Downstate Police & Fire Pension Funds in Illinois. The Unit's staff also fulfills the statutory responsibilities set forth in the Public Safety Employee Benefits Act.
- The **Research Unit** primarily performs research and provides information as may be requested by members of the General Assembly or legislative staffs. Additionally, the Unit maintains a research library and, per statute, collects information concerning state government and the general welfare of the state, examines the effects of constitutional provisions and previously enacted statutes, and considers public policy issues and questions of state-wide interest. Additionally, the Unit publishes a monthly Abstracts Report of annual reports or special studies from other state agencies, the *Illinois Tax Handbook for Legislators, Federal Funds to State Agencies, Preface to Lawmaking,* various reports detailing appointments to State Boards and Commissions, the *1970 Illinois Constitution Annotated for Legislators,* the *Roster of Illinois Legislators,* and numerous special topic publications.
